

LIFE FINDER™ LF-6™

The **LIFE FINDER LF-6™**, provides another fully digital, fully automatic hand-held infrared system for Law-Enforcement and/or Search and Rescue use. New, cutting-edge software makes the **LIFE FINDER LF-6™** fully automatic and simple to use - Just turn it on and it automatically adjusts to your environment - any environment. It includes the automatically controlled "**Selective-Sensing**" that virtually

eliminates false readings, and visual "**Pattern-Recognition**" technology. This simple to use product has extreme range and brush penetration which makes it effective for all types of search and rescue/capture operations. The **LIFE FINDER LF-6™** features a laser pointer that assists in nighttime searches and can be used to point towards heat sources. With new advanced audio technology, the **LIFE FINDER LF-6™** creates different sounds for people and different animals (Similar to metal detectors in which different sounds are created for different metals). To remotely monitor a trail, plug the audio output into a VOX radio. Light-weight and portable, the **LIFE FINDER LF-6™** includes a black pouch and operates with two AA
